YOUR GROUP23 PATIENT HEALTH JOURNEY

DIAGNOSIS: HIP & KNEE OSTEOARTHRITIS

The Problem Spoiler - it's not your actual injury!

Traditional sport medicine attempts to address physical complaints with purely physical treatments. Unfortunately, this care leaves many patients unsatisfied and far from a full and robust recovery.

Why is that?

Patients do not fully understand their diagnosis or what is truly causing their pain and symptoms. In many cases, health care providers fail to provide the appropriate patient education about an injury, the various possible impacts, and treatments.

There is no clear plan or pathway forward. "Fill this prescription and follow up in a few weeks" may seem like a plan, but *it simply is not comprehensive enough* for you to fully commit mentally and emotionally. Where are you going? What's the end goal?

Failure to take an integrated Bio-Psycho-Social-Spiritual approach to care. None of us are the same, and *we don't inhabit a purely physical world.* Our experiences and reactions to injury, pain, and movement restrictions are part of our personal, unique interconnection between biological, psychological, social, and spiritual factors.

Your Rise Above Patient Health Journey

The Group23 solution asks that you:

Become an expert. We believe every patient at Group23 should be able to *understand and explain their diagnosis*. We'll teach and provide information because *the more* you know, *the more* you will understand the treatment plan, and *the better* success you will have.

See your treatment plan as a Journey. Your Health Journey will begin by having you set your Rise Above goal(s). Goals establish a benchmark for measuring the success of treatment interventions and more importantly, they *ensure every treatment decision reflects your priorities*, not ours.

Take an integrated Bio-Psycho-Social-Spiritual approach. You must recognize your injury, pain, and disability aren't *isolated in a physical dimension* of life. Consider your social situations, stressors, and overall mental well being, as it is inevitable your injury or pain will be impacted by other areas of your life - think about how grumpy you get when you can't kick a cold!

Now what?

- ✓ go online and read all about your injury at group23.ca/riseabove. Become an expert!
- ✓ watch our three videos to understand the Journey we're on together
- ✓ set your SMART goals
- ✓ book a Group23 physiotherapy assessment
- ✓ book a Group23 massage appointment

Why do we care about goals?

- ✓ a good goal indicates if you have become an expert, and
 actually understand the implications of your diagnosis
- √a personal goal ensures every treatment decision reflects YOUR priorities, not ours
- ✓ they show when we have arrived at success, which will look different for everyone

Make your Rise Above Goal S.M.A.R.T

Specific | Measurable | Actionable | Realistic | Time Bound

Example: Be able to go on a 50-km bike ride three days a week, in three months.

- **✓ S**pecific
- ✓ Measurable
- ✓ Actionable
- ✓ Realistic
- **▼** Time Bound

Example: I want to get rid of my pain.

- **X** Specific
- ✓ Measurable
- **X** Actionable
- X Realistic
- X Time Bound

On my Health Journey, my Rise Above Goal(s) are:

- 2
- 3

Group23 Navigation Toolkit

\bigcirc	Activity Modifications
	 □ minimize aggravating activities: pounding, running, jumping, pivoting, deep squatting □ LOW impact exercise: biking, elliptical, swimming, or lane walking in pool □ learn to listen to your body: if you get pain/stiffness after activity, you're not ready for it
	Physiotherapy
	 □ exercise-based physiotherapy, with individualized Group23 program □ group-based physiotherapy: GLAD Program Advanced physical therapies □ AlterG training □ blood flow restriction training □ shockwave therapy
	Massage □ self massage: massage gun, foam roller, lacrosse ball, Tiger Tail □ massage therapy, with individualized Group23 program Alternative muscle pain reduction therapies □ active release therapy (ART), Graston (chiropractic)
\bigcirc	☐ TENS machine (Transcutaneous Electrical Nerve Stimulation) Health & Wellness
	☐ free Group23 health & wellness assessment session ☐ self management or commercial program Note: weight management – OA guidelines strongly recommend weight loss for patients if Body Mass Index (BMI) > 25

Now that we know where we're going, how do we get to **your** SMART goal **destination**?

All the following tools are *options* on your Journey, and tracking results will help us develop your personal treatment plan.

O Bracing, Orthotic Supports & Other Gear	
☐ supportive footwear at ALL times indoors & outdoors ex.	
HOKA shoes, Birkenstock	
\square over the counter arch supports ex. Powerstep, Bauerfiend,	
Superfeet, Sole, Kneed etc.	
\square walking aids: hiking poles, canes	
☐ Core Shorts	
□ custom hip 'unloader' brace	
□ custom knee 'unloader' brace	
O Pain Management	
Icing	
☐ home icing: 15-20 minutes every hour as needed	
☐ commercial ice & compression machine with hip and/or	
knee attachments	
Prescription topical anti-inflammatory creams	
☐ Diclofenac 10% +/- Menthol	
☐ Ketoprofen/Pentoxifylline/Cyclobenzaprine +/-	
Lido/Menthol	
☐ Ketoprofen/Baclofen/Amitriptyline/Lidocaine +/- Gabapentin	
Over the counter pain and swelling control (take as directed by MD))
□ acetaminophen (Tylenol) – for baseline aching	
☐ ibuprofen (Advil/Motrin) – for flares of pain/stiffness	
☐ naproxen (Aleve) – for flares of pain/swelling	
Prescription anti-inflammatory medications	
□ naproxen/esomeprazole 500/20mg (Vimovo) tablets	
☐ diclofenac/misoprostol 50mg/200mcg (Arthrotec) tablets	
☐ celecoxib (Celebrex) 200mg capsules	
Second-line, add on medications & other options	
☐ nutritional supplement review and discussion	
☐ duloxetine (Cymbalta)	
\square anti-inflammatory diets	
☐ CBD products	
Third-line medications	
☐ tri-cyclic anti-depressants (TCAs): Amitriptyline, Nortriptyli	ne

Injections

Standard injection therapies at Group23 Injection Clinic		
\square cortison	e: Depo-Medrol (Methylprednisolone) or Kenalog	
(Triamcino	lone)	
\square hyaluror	nic acid ("visco-supplements"): Monovisc, Durolane,	
Synolis VA		
\square hyaluror	nic acid and cortisone combination: Cingal	
□ non-ster	oidal anti-inflammatory injection: ketorolac (Torad	ol
Regenerative injection therapies at Group23 Regenerative Clinic		
\square platelet	rich plasma (PRP) ex. Harvest PRP	
\square autolog	ous protein solutions (APS) ex. nStride	
Surgical	Discussion	
\Box hip arth	oscopy for labral tearing and very mild	
osteoarthr	itis	
\square knee art	hroscopy for meniscal tearing and very mild	
osteoarthr	itis	
\square hip and/	or knee replacement(s)	

REMEMBER: You are on a personal Journey, and while all these tools are available to you, they won't all make sense for your individual destination, the nature of your injury, and your personal finances.

All CIRCLES must be checked, which means trying **at** least one BOX from each section.

Did it help?	Did it last?

My Health Journey team at Group23 is:

Physician -

Physiotherapist -

Massage therapist -

Health coach -

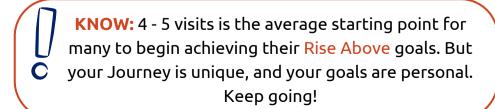

KNOW: We practice sports medicine differently and ask you to *take responsibility and actively participate* in this Health Journey. Our integrated clinic believes in **comprehensive care** and **provides everything you need** in your rehabilitation journey: physiotherapy, massage, health coaching, x-rays, injections, orthotics & bracing, and other elite treatment options.

At your first visit, let's discuss:
\square assessment, diagnosis, and imaging (x-rays, MRI, ultrasounds)
☐ our Group23 concept of care
 setting SMART Rise Above goal(s)
 likely stops on your Patient Health Journey
☐ your best options from our Rise Above Navigation Toolkit
 activity modifications
 rehabilitation options
 pain management
☐ your homework (emails and at group23.ca/riseabove)
At future visits, review with your health care team:
□ pain levels
☐ Rise Above goals
\square bio-psycho-social barriers to recovery
☐ create your Rise Above Road Map
 activity modifications
 Group23 rehabilitation program
physiotherapy - status
massage - status
 health coaching - discuss
 orthotics and/or bracing - discuss
pain management
\square your homework (emails and at group23.ca/riseabove)
Are we there yet? Time to reevaluate or maintain:
□ reevaluate
ensure every category in the Navigation Toolkit has been tried
re-calibrate your Rise Above goals
discuss surgical options
repeat or additional diagnostic imaging as needed
□ maintain
 review necessary follow-up and rehabilitation maintenance

appointments
